PROFILE SUMMARY

A student in the Informatics program specializing in building modern web applications using React, Next.js, and the latest web technologies. Committed to applying academic knowledge through practical experience in frontend and full stack development. Considerable proficiency in creating modern, interactive, and user-centered websites. Known for a proactive approach to writing clean, maintainable code and delivering seamless user experiences. Creative, adaptable, and ready to contribute as a Frontend Engineer or Full Stack Developer.

EDUCATION

Amikom University Yogyakarta
Candidate for Bachelor of Informatics – Full-Stack Web Developer
Current GPA: 3.30/4.00

Yogyakarta, Indonesia
Sep 2023 – Present

PROJECTS

Puskesmas – Healthcare Information System
Full-Stack Developer

Yogyakarta, Indonesia
Aug 2026 – Sep 2026

- Developed a comprehensive digital healthcare platform SIPP for UPTD Puskesmas.
- Built using PHP, Laravel, and MySQL for a robust backend, with Bootstrap and Vite for a responsive frontend.
- Implemented key features including online queue registration, doctor schedules, and a public complaint service.

Fitmind AI – Health & Fitness Application
Full-Stack Developer

Yogyakarta, Indonesia
July 2026 – Aug 2026

- Developed an AI powered application that proactively provides context based recommendations.
- Integrated Google Gemini API through a decentralized architecture using Firebase and React Native.
- Delivered personalized health insights with AI response latencies under 2 seconds.

Kovana Coffee – Coffee Roasters
Frontend Developer

Yogyakarta, Indonesia
Jun 2025 – July 2025

- Developed a frontend heavy SPA integrating a landing page, dynamic menu, ordering system, and secure admin dashboard.
- Utilized TypeScript, Vite, and Tailwind CSS for modular architecture, with GSAP for smooth animations.
- Optimized images using Next.js Image for fast loading performance and designed a responsive UI highlighting the gallery and customer testimonials sections.

SKILLS

Frontend: Next.js, React, JavaScript, TypeScript, Tailwind CSS, HTML5, CSS3.

Backend: PHP, React Native, PostgreSQL, MySQL.

Tools: Git, GitHub, Vite.
